

ALOE FEROX

BITTER CAPS

Supports Normal, Daily,
Healthy Bowel Function

Aloe Ferox Bitter Caps is formulated with more bitter extract than our original Whole Leaf Caps. This product is for people who want a higher concentration of the specific nutrients in the bitter sap of the Aloe Ferox leaf, without the need to swallow more capsules.

In addition to the bitter sap, Aloe Ferox Bitter Caps also contains the Aloe Ferox leaf gel, which provides the plant's complete array of vitamins, minerals, fatty acids, amino acids, polysaccharides and fiber.

The natural "whole leaf" of the Aloe Ferox plant is a complete multi-vitamin.

Aloe Ferox Bitter Extract

Aloe Ferox Bitter Caps provides a natural enzyme form of vitamins and minerals that support immune function and whole-body health, with a focus on normal, daily, healthy bowel function.

What makes Aloe Ferox Bitter Caps unique?

This is a totally raw product with no heat applied in drying the bitter sap or the leaf gel. These ingredients are then milled into a fine powder, suitable for encapsulation without flow agents.

The Aloe Ferox leaf powder and bitter extract powder found in this product are derived from organic, wild grown, sustainably harvested Aloe Ferox leaves.

Aloe Ferox Bitter Caps provides a complex of natural vitamins, minerals, amino acids, antioxidants and polyphenols that support normal, daily, healthy bowel function.

Aloe Ferox Bitter Caps are encapsulated without excipients, and bottled in Miron Violet Glass for maximum protection.
