

ALOE FEROX

LEAF POWDER

Supports Normal, Daily,
Healthy Bowel Function

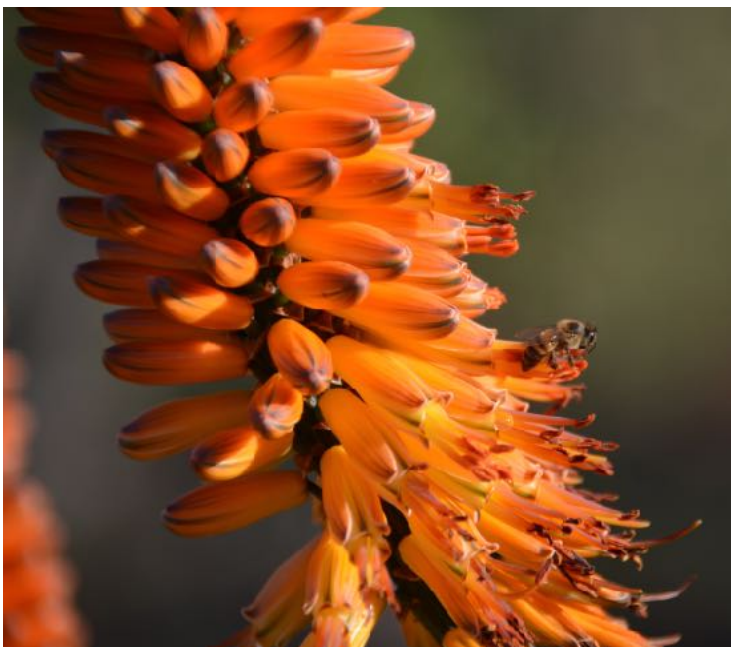

Aloe Ferox Leaf Powder is made from organic, wild grown South African Aloe Ferox plants. Sustainable harvesting allows the aloes to thrive for many years. Mature Aloe Ferox leaves are cut from the stem, the bitter sap drained, and leaf gel is sun-dried before being milled into a fine powder. Nothing else is added. Packaged in Miron Violet Glass for maximum protection.

The Aloe Ferox Leaf Powder is the least bitter of immunologic's Aloe Ferox products.

Aloe Ferox flowers in winter, with seeds pollinated by birds like this southern double-collared sunbird. The bees also make excellent honey while pollinating Aloe Ferox flowers.

Aloe Ferox Leaf Powder is made without excipients, fillers or flavors, and bottled in Miron Violet Glass for maximum protection.

Nutrients found in the leaf gel of the Cape Aloe Ferox include vitamins, minerals, essential fatty acids, essential amino acids, polysaccharides, chlorophyll and fiber. A small amount of bitter anthraquinones remain in the dried leaf powder.

The Aloe Ferox Leaf Powder found in this product is derived from organic, wild grown, sustainably harvested Aloe Ferox leaves.

Aloe Ferox is the king of nature's multivitamin plants, with a complex of nutrients that support normal, daily, healthy bowel function, the immune response, the skin, and liver-gallbladder health.

Some of these health beneficial compounds include phenolic acids, phytosterols, fatty acids and indoles.

A warm tea of Aloe Ferox Leaf Powder supports normal, healthy bile flow.

Suggested use:

1/4 teaspoon taken as a warm tea, one or two times daily.
