

ALOE FEROX

WHOLE LEAF CAPS

Supports Normal, Daily,
Healthy Bowel Function

Aloe Ferox winter flower

Aloe Ferox Whole Leaf Caps is prepared from wild grown, organic, South African Aloe Ferox leaves.

Aloe Ferox Whole Leaf Caps combines two components of the Aloe Ferox leaf - the dried leaf gel and the bitter sap - for their broad range of vitamins and immune supporting compounds.

Aloe Ferox is very bitter, and thus this product is prepared in vegetable capsules without excipients (no blending or flow agents) to support normal, daily, healthy bowel function. However, for people who like extreme bitter, a tea can be made by adding the contents of one or two caps to warm water. The bitter Aloe Ferox nutrients also support normal bile flow, for healthy liver and gallbladder function.

Aloe Ferox is a hardy, drought resistant succulent indigenous to South Africa, with an extraordinary range of nutrients, including vitamins, minerals, fatty acids, amino acids, chlorophyll, fiber and monosaccharides: rhamnose, fucose, arabinose, xylose, mannose, galactose and glucose. The bitter anthraquinone called aloin in Aloe Ferox makes it the natural choice for normal, daily, healthy bowel and immune function.

Aloe Ferox Bitter Extract Powder

Aloe Ferox Leaf Powder

Aloe Ferox Whole Leaf Caps provides a complex of natural vitamins, minerals, amino acids, antioxidants and polyphenols that supports normal, daily, healthy bowel and immune function.
